

Government consults on whether to use vaccine/test certificates in relaxing CV 19 controls

I reproduce below the government's words on its consultation. Knowing there are strong views here I recommend you reply to the government directly.

"Consultation description

The government is reviewing whether COVID-status certification could play a role in reopening our economy, reducing restrictions on social contact and improving safety.

COVID-status certification refers to the use of testing or vaccination data to confirm in different settings that individuals have a lower risk of getting sick with or transmitting COVID-19 to others. Such certification would be available both to vaccinated people and to unvaccinated people who have been tested.

The government will assess to what extent certification would be effective in reducing risk, and its potential uses in enabling access to settings or relaxing COVID-secure mitigations.

The government is looking to consider the ethical, equalities, privacy, legal and operational aspects of a potential certification scheme, and what limits, if any, should be placed on organisations using certification.

We are issuing this call for evidence to inform this review into COVID-status certification, to ensure that the recommendations reflect a broad range of interests and concerns. We welcome views from all respondents.
