

Government received 30 expression of interest submissions for Smart and Green Mass Transit System in Kai Tak project

The Transport and Logistics Bureau, jointly with the Civil Engineering and Development Department (CEDD), invited relevant system suppliers and operators to submit expression of interest (EOI) for the smart and green mass transit system (SGMTS) project in Kai Tak on August 29. The invitation of the EOI was closed today (October 24) at noon and a total of 30 submissions from local, Mainland and overseas companies have been received.

A spokesperson for the CEDD said, "We will immediately commence analysing the information from the EOI. Such information will serve as a reference for ascertaining the technical details, delivery mode and financial arrangements of the project. We target to invite tenders for the project next year with an aim to award the works contract in 2026."

"As announced by the Chief Executive in his Policy Address this year, the Government will continue to take forward the SGMTS in Kai Tak project in full swing and, through innovative implementation modes and construction methods, compress the implementation programme. Our target is to complete the project three years ahead of the original target commissioning date," the spokesperson added.
