

Government to gazette compulsory testing notice and specifications under Prevention and Control of Disease (Compulsory Testing for Certain Persons) Regulation

â€‹The Government will exercise the power under the Prevention and Control of Disease (Compulsory Testing for Certain Persons) Regulation (Cap. 599J) and gazette a compulsory testing notice and specifications, which require any person who had been present at 17 specified premises during the specified period (persons subject to compulsory testing) to undergo a COVID-19 nucleic acid test, and continue to empower a registered medical practitioner to require any person whom he clinically suspects has contracted COVID-19 to undergo a test during a period of 14 days from May 15 to May 28, 2021.

Compulsory testing notice

A spokesman for the Food and Health Bureau reminded the public that persons who have completed a COVID-19 vaccination course would be taken to have complied with the requirements set out in the compulsory testing notices and hence are not required to undergo compulsory testing. Completion of the vaccination course in general means having received two doses of COVID-19 vaccine 14 days ago.

â€‹ In relation to the previous local cases involving N501Y mutant strain, any person who had been present at six specified premises during the specified period had to undergo additional testing. Furthermore, since there were outbreaks of upper respiratory tract infection and/or influenza-like illness in 11 schools, and the symptoms of the concerned diseases are similar to those of COVID-19, for prudence's sake, the 11 schools are also covered in the compulsory testing notice today (May 14). Under existing practice, the Centre for Health Protection (CHP) will provide these kindergartens and schools with stool specimen bottles or deep throat saliva specimen collection packs direct.

Details of the compulsory testing notice are at Annex 1.

In addition, subsequent to the announcement by the CHP on the updated quarantine arrangements of local COVID-19 cases with the N501Y mutant strain, persons who resided or worked within the same building as the residence of relevant cases and had been released from the quarantine centres will be subject to compulsory testing on the 3rd, 7th, 12th and 19th day counting from the announcement of the relevant confirmed case by the Department of Health (DH). Relevant persons have to undergo testing on specified dates. They will also be required to undergo self-monitoring until the 21st day (see

the details of the buildings and dates of testing at www.coronavirus.gov.hk/pdf/CTN_Specified_premises_and_Dates_of_Testing.pdf).

Moreover, all foreign domestic helpers (FDHs) working in Hong Kong have to undergo compulsory testing for the second time during the period from May 15 to May 30. Details at [here](#).

In accordance with the compulsory testing notice issued earlier, all household members of close contacts are required to undergo compulsory testing. Any person who had lived with a person placed under quarantine pursuant to section 22 of the Prevention and Control of Disease Regulation (Cap. 599A) (person under quarantine) in the same residential unit on the date of commencement of quarantine or during the 14 days before that day, and who becomes aware of the quarantine of the person under quarantine when the relevant quarantine has not yet been completed, has to undergo testing within two days of him or her becoming aware that the person under quarantine has been placed under quarantine and report to the Government the result of the test by phone (at 6275 6901), fax (at 2530 5872) or email (ct@csb.gov.hk) within three days of undergoing the test.

Currently, there are a total of 21 community testing centres (CTCs) providing testing service for the public, including free service for persons subject to compulsory testing. Booking and walk-in services are available. Members of the public only need to provide simple personal information on the 24-hour booking system (www.communitytest.gov.hk/en). The system was enhanced to show the booking status of the centres for the coming 16 days to facilitate public's planning and selection of suitable testing centre and time slot for testing. The testing centres will accord priority to serve individuals with advance bookings. The number of tests available for appointments at CTCs has been increased to over 46 000 per day, and additional manpower has been deployed to serve the public. As of 6pm today, there are around 16 000 booking places available for tomorrow (May 15) at the CTCs, and around 64 per cent and 76 per cent booking places for the coming seven days and 14 days respectively. Members of the public may call the testing centres for enquiries on the availability of bookings or walk-in quotas before visiting the centres.

The Government will set up mobile specimen collection stations at the following locations tomorrow for persons subject to compulsory testing for free testing:

- Chai Wan Park (Basketball Courts No.1 and 2) (May 15 to 17)
- Hing Wah Estate Playground No. 1, Chai Wan (May 15 to 17)
- Podium, 7/F, Block R, Allway Gardens (May 15)

In addition to the new mobile specimen collection stations announced on May 12, the Government will also set up the following stations to meet the testing demand from persons subject to compulsory testing (including FDHs):

- Outside Harbour Building, Central
- North Point Vehicular Ferry Pier Playground
- Fly the Flyover 01, Kwun Tong

The service period of the mobile specimen collection stations at Kin Sang Community Hall in Tuen Mun will be extended to May 23 (Sunday), and that of the stations at Wong Tai Sin Square, Lai Kok Community Hall in Cheung Sha Wan and Sha Tsui Road Playground in Tsuen Wan will be extended to May 30 (Sunday).

Coupled with the 21 CTCs, there will be a total of 62 CTCs/mobile specimen collection stations in various districts tomorrow to provide free service for persons subject to compulsory testing, including 61 open to FDHs for free testing. The testing capacity should be sufficient to meet the demand. The opening dates and operating hours of the mobile specimen collection stations in various districts providing free COVID-19 nucleic acid testing services for the general public are stated in Annex 2. Persons subject to compulsory testing, and those with "LeaveHomeSafe" COVID-19 exposure notification or SMS notification from the Centre for Health Protection reminding them to undergo testing as soon as possible may receive free testing at CTCs or mobile specimen collection stations (if the service scope is applicable).

Persons subject to compulsory testing may choose to undergo testing via the following routes:

1. To visit any of the mobile specimen collection stations (see the list and target groups (if applicable) at www.coronavirus.gov.hk/eng/early-testing.html) for testing;
2. To attend any of the community testing centres (see the list at www.communitytest.gov.hk/en/);
3. To obtain a deep throat saliva specimen collection pack from any of the 121 post offices, vending machines set up at 20 MTR stations or 47 designated general outpatient clinics (GOPCs) of the Hospital Authority and return the specimen to one of the designated specimen collection points (see the distribution points and times, and the specimen collection points and times, at www.coronavirus.gov.hk/eng/early-testing.html);
4. To undergo testing at any of the GOPCs of the Hospital Authority as instructed by a medical professional of the Hospital Authority;
5. To self-arrange testing provided by private laboratories which are recognised by the Department of Health (DH) and can issue SMS notifications in respect of test results (see the list at www.coronavirus.gov.hk/pdf/List_of_recognised_laboratories_RTPCR.pdf); or
6. To use a specimen bottle distributed to the relevant specified premises by the CHP (if applicable), and return the specimen bottle with the sample collected as per relevant guidelines.

The spokesman cautioned that testing received at Accident and Emergency Departments of the Hospital Authority or during hospital stays, or testing provided by private laboratories which cannot issue SMS notifications in respect of test results, does not comply with the requirements of the aforementioned compulsory testing notice.

"If persons subject to compulsory testing have symptoms, they should seek medical attention immediately and undergo testing as instructed by a medical professional. They should not attend the mobile specimen collection

stations or the community testing centres."

Persons subject to compulsory testing must keep the SMS notification containing the result of the test for checking by a law enforcement officer when the officer requires the persons to provide information about their undergoing the specified test. Furthermore, persons subject to testing under the compulsory testing notices should, as far as reasonably practicable, take appropriate personal disease prevention measures including wearing a mask and maintaining hand hygiene, and, unless for the purpose of undergoing the specified test, stay at their place of residence and avoid going out until the test result is ascertained as far as possible. Any enquiries on compulsory testing arrangements may be addressed to the hotline at 6275 6901, which operates daily from 9am to 6pm. If persons subject to compulsory testing plan to conduct testing at any of the community testing centres, they can check the centre's appointment status in advance. The hotlines of the community testing centres are available at www.communitytest.gov.hk/en/info/.

Relevant specifications for compulsory testing for persons clinically suspected to have contracted COVID-19

According to expert advice, compulsory testing for symptomatic patients can effectively slow down the transmission of the virus by early identification, early isolation and early treatment. To keep the epidemic situation under control, the Government considers it necessary to continue to solicit help from medical practitioners in identifying possibly infected persons as soon as possible.

During the period of 14 days from May 15 to May 28, 2021, registered medical practitioners may, by a written direction, require a person whom the medical practitioner attends to in the course of professional practice and clinically suspects to have contracted COVID-19 to undergo a COVID-19 nucleic acid test. Persons who receive the written direction (persons who are subject to testing under written directions) should undergo a test within two days after the issue date of the written direction (the testing deadline).

Persons who are subject to testing under written directions may choose to undergo testing via the following routes:

- (1) To use the specimen bottle provided by the registered medical practitioner who issued the written direction to collect a deep throat saliva specimen and submit the specimen bottle to designated specimen collection points by the testing deadline (see the specimen collection points and time at www.coronavirus.gov.hk/eng/early-testing.html). Having reported the case to the DH, the registered medical practitioner who issued the written direction will be notified of the test result; or
- (2) To self-arrange testing provided by private laboratories recognised by the DH (see the list at www.coronavirus.gov.hk/pdf/List_of_recognised_laboratories RTPCR.pdf) by the testing deadline and submit the test result to the medical practitioner who issued the written direction or his clinic staff by electronic mail, fax,

or by hardcopy within four days after the testing deadline.

For example, if the written direction is issued on Monday, the person subject to testing under the written direction should undergo a test via one of the above options on or before Wednesday, the testing deadline. If the test result of the specimen is preliminary positive, the specimen will be referred to the Public Health Laboratory Services Branch of the DH for a confirmatory test. Confirmed cases will be followed up and announced by the Centre for Health Protection of the DH.

"Persons who are subject to testing under written directions are suspected to be infected and should not attend the mobile specimen collection stations or the community testing centres for testing. To reduce transmission risk, relevant persons who underwent testing are advised to stay at home and avoid going out when waiting for test results."

Any person who fails to comply with the testing notices commits an offence and may be fined a fixed penalty of \$5,000. The person would also be issued with a compulsory testing order requiring him or her to undergo testing within a specified time frame. Failure to comply with the order is an offence and the offender would be liable to a fine at level 4 (\$25,000) and imprisonment for six months.

Relevant officers of different government departments are empowered to perform certain functions under the relevant Regulations under the Prevention and Control of Disease Ordinance (Cap. 599), including requesting individuals to provide information and assistance when necessary. Any person who fails to comply with the relevant request commits an offence and would be liable to a fine at level 3 (\$10,000). Collection and use of any personal data for conducting COVID-19 tests must meet the requirements under the Personal Data (Privacy) Ordinance (Cap. 486). Government departments or testing service providers which handle the relevant information may provide the data to DH or other relevant departments for anti-epidemic purpose as necessary. The workflow does not involve the provision of any personal data to organisations or persons outside Hong Kong.

The spokesman said, "The Government urges all individuals who are in doubt about their own health conditions, or individuals with infection risks (such as individuals who visited places with epidemic outbreaks or contacted confirmed cases), to undergo testing promptly for early identification of infected persons."
