Compared with the grading released last week, Clear Water Bay First Beach and Shek O Beach have been upgraded from Grade 2 to Grade 1, and Castle Peak Beach from Grade 3 to Grade 2. Silverstrand Beach has been changed from Grade 1 to Grade 2, and Anglers' Beach from Grade 2 to Grade 3.

"The changes are generally within the normal range of fluctuation of the bacteriological water quality of the beaches," an EPD spokesman said.

Under the present grading system, beaches are classified into four grades according to the level of E. coli in the water. Grades are calculated on the basis of the geometric mean of the E. coli counts on the five most recent sampling occasions.

While the ratings represent the general water quality at the beaches, the EPD spokesman reminded members of the public that water quality could be temporarily affected during and after periods of heavy rain. Bathers should avoid swimming at beaches for up to three days after a storm or heavy rainfall.

A summary of beach grades is published weekly before the weekend.
