

# Grading of beach water quality released

The Environmental Protection Department (EPD) today (May 13) released the latest grading of water quality for 38 gazetted beaches (see Note 1) and one non-gazetted beach (i.e. Discovery Bay, see Note 2).

Thirty-two beaches were rated as Good (Grade 1), three as Fair (Grade 2) and four as Poor (Grade 3).

Grade 2 beaches are:

Grade 3 beaches are:

Approach Beach	Lido Beach*
Casam Beach*	Ma Wan Tung Wan Beach*

Compared with the grading released last week, Discovery Bay has been upgraded from Grade 2 to Grade 1. Approach Beach and Casam Beach have been changed from Grade 2 to Grade 3.

"The changes are generally within the normal range of fluctuation of the bacteriological water quality of the beaches," an EPD spokesman said.

Under the present grading system, beaches are classified into four grades, namely Good (Grade 1), Fair (Grade 2), Poor (Grade 3) and Very Poor (Grade 4), according to the level of E. coli in the water. Grades are calculated on the basis of the geometric mean of the E. coli counts on the five most recent sampling occasions.

While the ratings represent the general water quality at the beaches, the EPD spokesman reminded members of the public that water quality could be temporarily affected during and after periods of heavy rain. Bathers should avoid swimming at beaches for up to three days after a storm or heavy rainfall.

A summary of beach grades is published weekly before the weekend. The latest beach grades based on the most current data may be obtained from the EPD's website on Beach Water Quality ([www.epd.gov.hk/epd/beach](http://www.epd.gov.hk/epd/beach)) or the beach hotline, 2511 6666.

Note 1: Lifeguard services are provided by the Leisure and Cultural Services Department at 15 gazetted beaches, marked with an asterisk (\*) above, from May 5.

Note 2: Discovery Bay is a non-gazetted beach without lifeguard service.
