

Guidance: Coal Authority data set prices per royalty unit

The Coal Authority licence applied to data supplied to third parties, including the Coal Authority's own mining reports business, for the purpose of creating mining search reports and related products as described by the Coal Authority's public task.

These royalty rates apply with effect from 1 December 2015 until further notice. Royalty units are payable per data set per third party report or product produced. Different royalty rates apply to third party 'Residential' and 'Commercial' reports.

Residential

A single unit residential property, either existing or currently being built, such as a single plot on a residential development site. For all residential reports a single royalty unit per data set per third party report produced will apply.

Commercial

Non-residential property, commercial or development sites, multiple unit residential sites, or non-residential sites. For all such sites up to a maximum of 25 hectares a single royalty unit per data set per report produced will apply.

All such sites greater than 25 hectares will be charged in whole multiple royalty units of 25 hectares, such as a site of 26 hectares will be charged at two royalty units per data set per report produced.
