

Guidance: ETL product types: motors and drives

Updated: Updated to reflect changes to the product categories on the Energy Technology List

The leaflet explains the types of motors and drives equipment included in the Energy Technology List and Enhanced Capital Allowance (ECA) scheme

- line operated motors
- variable speed drives
- converter-fed motors

See the [Energy Technology Product List](#) for the eligible products in this category, listed by brand name.

See the [Energy Technology Criteria List](#).
