The Home Affairs Department made the above arrangements in the hope of identifying infected persons early, so as to better protect the infected persons and their families. However, the Government stresses that rapid test kit testing is not a substitute for the Government's compulsory testing requirement.

For more information on rapid test kits, please view the following demonstration video produced by the Centre for Health Protection, the Department of Health: www.youtube.com/watch?v=yzFAUzTtmKk.

The Government appeals for the co-operation of members of the public to safeguard the health of themselves and their families by undergoing testing on a voluntary basis and fighting the virus together. The Government urges all individuals who are in doubt about their own health condition, or individuals with infection risks (such as individuals who visited places with epidemic outbreaks or had contact with cases that tested positive), to undergo testing promptly for early identification of infected persons to reduce the transmission risks of COVID-19.
