RR1100 – Evaluation of the DRIFT gas dispersion model version 3.6.4

The Health and Safety Executive (HSE) uses gas dispersion modelling in its assessment of the hazards and risks posed by toxic and flammable substances stored at major hazards sites. To update its dispersion modelling capability, HSE recently commissioned ESR Technology to develop a new version of the gas dispersion model DRIFT (Dispersion of Releases Involving Flammables or Toxics). The new version of the model, DRIFT Version 3 (DRIFT 3), includes a significant number of modelling enhancements over the version of DRIFT previously used within HSE (DRIFT 2.31). These include the extension of the model to treat buoyant plumes and time varying releases. Prior to DRIFT 3 being adopted for use by HSE, it must undergo thorough evaluation and assessment.

This report describes the evaluation of DRIFT version 3.6.4 in accordance with a Model Evaluation Protocol originally developed for the evaluation of liquefied natural gas (LNG) vapour dispersion models. The protocol sets out a method of scientific assessment, verification and validation for heavy gas dispersion models where the results are recorded in a model evaluation report (MER). Overall, the evaluation exercise found DRIFT version 3.6.4 to be fit for purpose.

Free health and safety seminar programme at The Cleaning Show 2017

The Health and Safety Executive will be running a morning of free seminars at

the cleaning show this year to help employers protect their workforce and reduce costs attributed to managing staff absence.

Topics to be covered include:

- working at height
- preventing slips and trips
- occupation respiratory health
- MSDs
- vulnerable workers

For more information and to book your place go to [The Cleaning Show 2017](#)

[HSL: The Way Forward – Excelling in Health and Safety Culture and Leadership – Buxton, 19 July 2017](#)

[Book Course](#)

HSL is to run a 1 day course on The Way Forward – Excelling in Health and Safety Culture and Leadership.

[ETC Venues – Marble Arch
Garfield House
London
W2 2EA](#)

19 July 2017

PLEASE NOTE THIS COURSE WILL BE HELD IN LONDON

- Have you reached a plateau in health and safety performance?
- Do you have an understanding of how good your health and safety culture is?
- Do you understand the impact of leadership on your health and safety culture?
- Are you seeking to improve how your business leads on health and safety?
- How confident are you in your ability to lead others to achieve health and safety cultural excellence?

What sort of leader are you? A variety of terms are used to describe the best leadership style: transactional, transformational, authentic, and resonant, to name a few. But what do these terms mean and which is the best?

HSL have undertaken research in the field of health and safety leadership, which identifies it as requiring a distinct set of competencies. Drawing on

HSL's expertise as psychologists and human factors experts, this event will help you develop your understanding of these competencies. Coupled with an understanding of what excellent health and safety culture looks like, this event will help you in driving a consistent approach to health and safety leadership within your business.

This event will:

- Explore delegates' views on what health and safety culture is, reflecting on the importance of a just culture and the need to aspire towards becoming a high reliability organisation
- Define health and safety culture, reflecting on psychological, behavioural and situational components
- Safety culture and your business: enable you to understand the factors that can influence the development of a positive health and safety culture.
- Know how important it is to have an effective health and safety management system
- Consider methods that you might use to assess H&S culture and climate, including the use of KPIs, SPIs, leading and lagging indicators
- Know how important leadership is for health and safety culture
- Identify the key health and safety values and associated standards required for effective health and safety leadership introducing HSL's evidence based leadership model
- Give you an opportunity to reflect on your own leadership style and identify specific competencies [\[1\]](#) that you feel you need to meet the identified standards

You will leave the event with the knowledge required to reflect and enhance your own leadership skills, influence those of others and positively influence your organisation's health and safety culture and therefore business performance.

Event delivery

The event will be delivered by HSL consultants/trainers who are experts in the field of health and safety culture and leadership. The trainers will draw upon their experiences of working with a variety of industries and organisational sizes both within the UK and globally.

Who should attend?

Those with responsibility at any level for leading and managing in the field of health and safety e.g. Chief executives, H&S Directors, Operations Directors, HR managers, H&S managers, H&S professionals.
