

Unregistered gas installer fined after failing to answer questions from HSE inspector

A plumber who was suspected of having undertaken dangerous gas work while unqualified to do so, was fined for failing to answer questions put to him by a Health and Safety Executive inspector.

In February 2020 Luke Rodgers was alleged to have carried out unlawful gas work to replace a boiler at a house in Tingley, Wakefield. The new boiler was left in such a dangerous condition that a Gas Safe registered engineer who attended the house had to make it safe by disconnecting it from the gas supply.

During a HSE interview under caution, Mr Rodgers claimed to have only been hired to do the installation work up to the point where it would then be connected to the gas supply. He claimed that he had arranged for a friend who was qualified to complete all the gas work. Mr Rodgers also stated that another friend had assisted him with general labouring at the property.

During the interview, Mr Rodgers was unwilling to provide the identity of either people which is an offence as it prevented the inspector from following reasonable lines of enquiry as part of the investigation.

At Huddersfield Magistrates' Court Luke Rodgers of Chapel Street, Wakefield, West Yorkshire pleaded guilty to breaching Section 33(1)(e) of the Health and Safety at Work etc Act 1974. He was fined £583 and ordered to pay £1,500 in costs at a hearing on August 8, 2022.

After the hearing, HSE inspector David Beaton said: "The defendant blatantly failed to comply with a requirement under the Health and Safety at Work (etc) Act 1974. This prosecution would not have happened had the defendant provided the information.

"Hopefully, this will send a warning to others that failing to comply with Her Majesty's Inspectors while they exercise their lawful powers will not be condoned by the HSE."

[Heat warning: Employers must prepare for a warmer future](#)

Employers need to act now to make sure their workplaces are ready for warmer weather in the future.

The Health and Safety Executive (HSE) is advising businesses to think how they need to adapt to warmer working conditions for their staff.

After last month's record-breaking temperatures and with more hot weather expected this week, HSE is asking employers to ensure extreme heat becomes part of their long-term planning.

With temperatures reaching an unprecedented 40°C in some parts of England in July, adapting to climate change is something all businesses will need to consider as warmer weather becomes more frequent.

Employers have a legal obligation under the Management of Health and Safety at Work Regulations to assess risks to the health and safety of workers. They must review the risk controls they have in place and update them if needed. This includes risks from more frequent extreme weather such as heatwaves.

While there is [no maximum temperature for workplaces](#), all workers are entitled to an environment where risks to their health and safety are properly controlled. Heat is classed as a hazard and comes with legal obligations like any other hazard.

The Workplace (Health, Safety and Welfare) Regulations, which require employers to provide a reasonable temperature in the workplace.

John Rowe, HSE's Acting Head of Operational Strategy, said: "We expect employers to take this recent weather event as the prompt to review how they assess the risk of high temperatures in their workplace and identify now those changes that will future proof them.

"All workplaces need to acknowledge that the working environment is changing. There are low-cost adaptations to the structure of work, but things like improved ventilation and air conditioning should also be considered which will involve investment in the workplace.

“Extreme heat that we have witnessed of late isn’t going to stop and we want employers to plan and respond to this now.”

[Employee crushed by bus suffers life-changing injuries](#)

A bus company has been fined £380,000 after one of its employees was crushed between a reversing bus and a stationary vehicle.

The employee of Stagecoach Devon Limited was working at the company’s Torquay depot on the morning of 3 October 2019.

Due to space limitations, buses often had to reverse to be able to leave the depot in readiness for the day’s work.

The sole banksman, who would direct vehicles, was occupied at the top of the depot where most buses were parked.

As a result, it became custom and practice for the bus drivers at the front of the depot to reverse without a banksman, or to assist each other when reversing, despite not being trained as banksmen.

The injured employee, who was caught between a reversing bus and a stationary vehicle, suffered compound multiple fractures of his arm requiring six titanium plates and 65 metal staples between his wrist and elbow.

An investigation by the Health and Safety Executive (HSE) found that Stagecoach Devon Limited failed to put a suitable and sufficient risk assessment in place.

This should have identified the risks inherent in the bus parking layout and action could have been taken to remove the need to reverse or mitigate the risks from reversing. For example, changing the parking layout, providing a sufficient number of trained banksmen for peak times, and improved segregation of vehicles and pedestrians.

At Plymouth Magistrates Court Stagecoach Devon Limited of One Stockport Exchange, 20 Railway Road, Stockport, pleaded guilty to breaching Section 2(1) of the Health and Safety at Work etc. Act 1974. The company was fined £380,000 and ordered to pay costs of £18,000.

Speaking after the hearing, HSE Inspector James Collins said: "Those in control of work have a responsibility to devise safe methods of working and to provide the necessary information, instruction and training to their workers in the safe system of work.

"If a suitable safe system of work had been in place prior to the incident, the life changing injuries sustained by the employee could have been prevented."

[Company fined after worker falls from a fork-lift truck while cleaning windows](#)

A carpentry and joinery company has been fined after a man working unsecured

on the forks of a fork-lift truck fell 3.5 metres to the ground.

On 14 June 2021, the man was working for Staircraft Group Limited at their head office site at Bayton Road Industrial Estate, Exhall, Coventry.

The employee was working from an unsecured stillage on the forks of a fork-lift truck in order to clean office windows at height. The stillage tipped and the employee fell 3.5 metres to the ground. As a result of the incident, he sustained a broken leg and an injury to his elbow.

An investigation by the Health and Safety Executive (HSE) found the company failed to identify that using a stillage to lift someone on the forks of a forklift truck, a method that they had used before, was unsafe. There was a lack of training for employees on the dangers of working at height without the proper equipment and there were no systems of work or risk assessments in place.

At Redditch Magistrates' Court Staircraft Group Limited, of Bayton Road Industrial Estate, Exhall, Coventry pleaded guilty to breaching Section 2(1) of the Health and Safety at Work Regulations 1974 and was fined £200,000 and ordered to pay costs of £6,477.93.

Speaking after the hearing, HSE inspector Rebecca Whiley said: "The employee's injuries were very serious, and he could have easily been killed.

"This serious incident could so easily have been avoided by simply carrying out correct control measures and safe working practices.

"Companies should be aware that HSE will not hesitate to take appropriate enforcement action against those that fall below the required standards."

The Lighthouse Construction Industry Charity joins HSE's Working Minds campaign

HSE's Working Minds campaign has added to its partner roster with the addition of the Lighthouse Construction Industry Charity.

Construction is one of the key focus sectors for the campaign and the Lighthouse Construction Industry Charity provides a new route for Working Minds to raise awareness of how to prevent work-related stress and encourage good mental health. Survey results published by [Construction News](#) show that the pressure to work to tight deadlines is the number one reason why workers say they are struggling at work.

The anonymous survey captured a picture of the mental health of UK construction workers and what has changed in recent years. More than half of workers taking part in the survey said that they did not receive the appropriate level of support with their mental health from their managers. And 59 per cent did not tell their employer that the reason they needed time off was for mental health, a slight improvement compared to 2019.

Bill Hill, CEO of the Lighthouse Club said, "No construction worker or their family should be alone in a crisis and we have a number of ways that people can reach out for support. We provide 24/7 free and confidential emotional, physical and financial support to our construction community in the UK and Ireland.

"A crucial element of the charity's strategy is to provide a range of free and easily accessible pro-active resources to support the construction community at an individual and employer level.

"Over 87% of the workforce are male and over 50% of the sector is made up of self employed, agency staff or on zero-hour contract workers. Many of these have no access to support so it's vital that we reach our 'boots on the ground' workforce to let them know about the support they can access."

Sarah Jardine, Head of Construction Division HSE, said: "The Working Minds campaign is calling for a culture change across Britain's workplaces where managing stress and talking about how people are coping is as routine as managing workplace safety.

"By increasing our campaign partners we are able to increase the reach and visibility of our campaign, allowing us all to achieve greater success. The Lighthouse Club, alongside existing partner [Mates in Mind](#), will help us to talk to businesses and workers in the construction industry. They will play an important role in sharing key information as well as provide essential insight into the unique stressors experienced by people working in the industry as we continue to evolve our campaign."

Working Minds is aimed specifically at supporting small businesses by providing employers and workers with easy to implement advice, including simple steps based on risk assessment to Reach out, Recognise, Respond, Reflect, and make it Routine.

More about the Lighthouse Construction Industry Charity.

The charity provides [free support services](#) to any construction worker or their family including;

- **24/7 Construction Industry Helpline, call 0345 605 1956**
- **Text HARDHAT to 85258** if you're uncomfortable talking and would rather text
- **Free Construction Industry Helpline mobile app**
- **Wellbeing Masterclass Sessions and MHFA training**
- **Lighthouse Beacons** volunteer centres around the UK where workers can drop in to socialise and meet others that are struggling with life problems.
- **Help Inside The Hard Hat** is an awareness campaign signposting to all the freeresources available for companies to help develop and execute wellbeing strategies.

The charity receives no public funding and relies entirely on the support of the construction community to raise funds to support the construction workforce and their families.
