

Quarrying company fined after blasting operation puts workers at risk

Breedon Trading Ltd has been fined for safety breaches after a fly rock projection event occurred during the use of explosives.

Llandudno Magistrates' Court heard that, on 15 January 2020, a blast at Cwt-y-Bugail Quarry in Llan Ffestiniog, Gwynedd, North Wales, resulted in rocks being ejected outside of the danger zone.

An investigation by the Health and Safety Executive (HSE) found that flyrock from the blasting operation, had landed approximately 270m away, punctured the roof of an occupied work shed, and put a hole in the outside pane of the occupied manager's office skylight window.

It was reasonably practicable for the company to ensure that the blasting did not give rise to danger by increasing the danger zone, clearing the increased danger zone, increasing the quality and quantity of stemming for the explosives in the blastholes, and by ensuring an adequate blasting specification was produced and authorised.

HSE found that there were poor stemming practices, the written specification was prepared after the firing of the blast, and an inadequate danger zone was in place. As a result there was a projection of flyrock outside of the danger zone that caused a quarry operative to run for cover and put other employees at risk when the roof of the shed they were working in was punctured.

Breedon Trading Ltd of Pinnacle House, Breedon Quarry, Breedon on the Hill, Derby pleaded guilty to breaching Section 2 (1) of the Health & Safety at Work etc Act 1974 by virtue of the Quarries Regulations 1999, regulation 25.

The company has been fined £300,000 and ordered to pay £2,534.80 in costs.

After the hearing, HSE's Adrian Jurg, HM Specialist Inspector of Quarries, commented: "Blasting operations at quarries are inherently high risk, and these risks must be rigorously controlled by good explosives engineering practice and in accordance with legal requirements.

"It is unacceptable that employees, and potentially members of the public, be put at serious risk of being hit by rocks that could easily lead to death or serious injury."

[Trailer manufacturing company fined after worker fell from height](#)

Montracon Limited has been fined for safety breaches after a worker suffered head injuries after falling from a stepladder.

Sheffield Magistrates' Court heard that the 57-year-old worker was cleaning the cant rail of a curtain side trailer that had just been manufactured.

Whilst using stepladders positioned on top of the trailer to reach the work the employee pulled the steps further down the trailer to clean the next section. As he climbed up the steps they started to wobble causing him to fall out of the trailer onto the floor, landing on his head.

An investigation by the Health and Safety Executive (HSE) found that there was no ladder inspection regime in place and the equipment being used was not in good working order.

Montracon Limited of Carr Hill Doncaster West Yorkshire pleaded guilty to breaching Regulation 6(3) of the Work at Height Regulations 2005. The company was fined £172,500.00 and ordered to pay £12,202.69 in costs

After the hearing, HSE inspector Anuja Mistry-Raval commented: "Equipment used to access work at height should be routinely inspected and checked to make sure it is in good condition and safe to use.

"This incident could so easily have been avoided by simply carrying out a proper risk assessment, implementing appropriate control measures and adopting safe working practices

"Companies should be aware that HSE will not hesitate to take appropriate enforcement action against those that fall below the required standards."

[Waste company fined after worker crushed between vehicles](#)

A waste management and skip hire company has been fined after a worker suffered multiple injuries when he was struck by a reversing vehicle.

Mold Magistrates’ Court heard how on 6 June 2019, a skip lorry driver drove into the waste management yard area of Thorncliffe Building Supplies’ Abergele site and parked his vehicle. As he was removing the net from the skip, a loading shovel from the same company reversed into the driver, trapping him between his vehicle and the loading shovel. He sustained life changing injuries including fractures to his pelvis and a crushed bowel.

An investigation by the Health and Safety Executive (HSE) into the incident found that the system of work to control risks from transport was not fully adequate and not monitored; and as a result, was not being followed therefore exposing workers to risks. At the time of the incident the inner banksman, who is responsible for managing traffic at the site, was not present at his station and there weren’t any measures in place to prevent new vehicles from accessing the site.

Thorncliffe Building Supplies Limited of Allt y Graig, Meliden Road, Rhyl pleaded guilty to breaching Section 2 (1) of the Health and Safety at Work Act 1974 and have been fined £180,000 and ordered to pay costs of £5,856.

Speaking after the case, HSE inspector Sarah Baldwin-Jones said: "This incident could so easily have been avoided by simply following correct control measures and safe working practices.

"Monitoring of the safe working practice and CCTV evidence would have highlighted risks created when the banksman left the yard area. A rising barrier fitted at the yard entrance, or relief cover for the banksman during the day, would have prevented this incident occurring.

"Companies should be aware that HSE will not hesitate to take appropriate enforcement action against those that fall below the required standards."

Construction company fined for unsafe removal of asbestos

A construction company has been fined after disturbing asbestos and removing it without adequate precautions at a pub in Trowbridge, Wiltshire.

Salisbury Magistrates' Court heard how, on 8 September 2018, Robert Angell undertook work to remove asbestos-containing material while renovating the property.

An investigation by the Health and Safety Executive (HSE) found the company was not licensed to carry out asbestos removal work and failed to take appropriate measures to prevent the spread of the asbestos waste while. As a

consequence the work undertaken exposed employees and neighbouring areas to risks from asbestos.

Robert Angell of York Road, Calne, Wiltshire was found guilty of breaching Section 16 of the Control of Asbestos Regulations 2012, together with section 5 (1) and 8(1) of the regulations. The company were fined £300.00 and ordered to pay £8,266.40 in costs.

Speaking after the hearing, HSE inspector Ian Whittles said: "The dangers associated with asbestos, including licensed asbestos, are well-known and a wealth of advice and guidance is freely available from the HSE website.

"Companies should be aware that HSE will not hesitate to take appropriate enforcement action against those that fall below the required standards."
