

Grain store company fined after worker fatally struck by lorry

A grain store company has been fined following the death of a worker at its site in Linton, Cambridgeshire.

Peterborough Crown Court heard how on 27 July 2016 an employee of Camgrain Stores Ltd suffered fatal injuries after being struck by a lorry at the site. Mr. Edward Orlopp had left the control room to walk across the site and on leaving the building he walked in front of a moving lorry. The driver had checked his mirrors but he did not see the employee and moved forward fatally injuring the employee.

Image showing no barrier segregating personnel from vehicles

An investigation by the Health and Safety Executive (HSE) found that Camgrain Stores Ltd had failed to ensure that pedestrians and vehicles could move safely around the site and that they had not provided measures to prevent employees walking into areas where large vehicles are moving.

Camgrain Stores Ltd of London Road, Balsham pleaded guilty to breaching Section 2 (1) of the Health and Safety at Work Act 1974. The company has been fined £180,000 and ordered to pay costs of £20,000.

After the hearing HSE inspector Stephen Faulkner said: "Being struck by vehicles is one of the most common causes of workplace fatal accidents. This

was a tragic and wholly avoidable incident caused by failure of the host company to undertake a number of simple measures.”

[Roofing company fined after worker falls from height](#)

A London based roofing company, McDonald Roofing Contractors Limited, has been fined after a worker fell a distance of nine metres from a flat roof he was working on.

Westminster Magistrates court heard how McDonald Roofing Contractors Limited were carrying out re-roofing works at 12 Glebe Road, SW13 0DR. Work began at the end of February 2018. On 12 March 2018 an employee of McDonald Roofing Contractors Limited was carrying out work on a flat roof. Whilst carrying out this work he stepped backwards from the flat roof. As a result of the fall the worker suffered a broken right shoulder blade, a broken right collar bone, and a fracture to the left side of his face.

An investigation by the Health and Safety Executive (HSE) found that the company had failed to ensure that the work at height was properly planned; appropriately supervised; and carried out in a manner which is so far as is reasonably practicable safe.

McDonald Roofing Contractors Limited of 6 Colville Road, London W3 8BL pleaded guilty to breach Regulation 4(1) of the Work at Height Regulations 2005 and fined £30,000 with full costs of £1483.00.

Speaking after the hearing, HSE inspector Adam Thompson said: “The case highlights the importance of ensuring that work at height is properly planned

and appropriately supervised.”

“The incident could so easily have been avoided by having suitable and sufficient edge protection around the flat roof.”

[Ferry company fined after worker suffers multiple fractures](#)

Red Funnel Ferries has been fined after a worker fell from the unprotected edge of its Red Falcon ship’s mezzanine car deck.

Southampton Crown Court heard how, on 24 September 2015, a worker was uncoiling a reel of electrical cable on a mezzanine deck at Southampton docks, when he inadvertently stepped off a raised edge and fell 2.5m to the lower deck, sustaining multiple fractures to his foot and wrist.

An investigation by the Health and Safety Executive (HSE) found that Red Funnel should have taken steps such as lowering the mezzanine deck or raising the edge protection barriers on the deck in order to eliminate the risk of falling from height.

The Southampton, Isle of Wight and South of England Royal Mail Steam Packet Company Ltd (trading as Red Funnel Ferries), of 12 Bugle Street, Southampton, Hampshire, S014 2JY pleaded guilty for failing to discharge the duty imposed upon them by Section 3(1) of Health and Safety at Work etc. Act 1974 and has been fined £30,000 and ordered to pay costs of £ 10,800.

Speaking after the case, HSE inspector Andrew Johnson said: “Companies have a duty to ensure the risks from working at height are properly controlled. Simple steps to eliminate the risk of falling or prevent it (through barriers etc.) were not taken and a serious injury occurred.”

Roofing contractor sentenced for unsafe work at height

A roofing contractor has been sentenced for failing to take adequate precautions to prevent his workers falling from height and for breaching a prohibition notice.

Llandudno Magistrates' Court heard how in April 2018 workers were observed working on the roof of a domestic two-storey house in Wrexham with no edge protection. A prohibition notice was issued preventing further work until control measures were put in place, but the contractor chose to ignore it and carried on working.

An investigation by the Health and Safety Executive (HSE), found that Asa Hamilton allowed his workers to be exposed to a continuing risk of falling from the roof, with potential for fatal or major injury.

Asa Hamilton of Linthorpe Road, Buckley, Flintshire pleaded guilty to breaching Regulation 6 (3) of the Work at Height Regulations 2005 for failing to provide precautions to prevent falls from height and Sections 33 (1) (e) and 33 (1) g of the Health and Safety at Work etc Act 1974 for failing to comply with a prohibition notice.

Mr Hamilton was sentenced to 12 months imprisonment, suspended for 12 months, plus 200 hours unpaid work. He was also ordered to pay a contribution of £4,000 towards the costs.

Speaking after the case HSE principal inspector Paul Harvey said “This was a serious incident and it is fortunate nobody was injured as a result of it. There are well known standards in the construction industry for controlling risks from falls from height. Even when the dutyholder was served a prohibition notice to stop the activity they failed to take the appropriate action.

“HSE will not hesitate to take enforcement action against those that disregard enforcement notices when served or fail to take appropriate measures to control well known risks”

[Company sentenced after employees exposed to silica dust](#)

A stone masonry company has been sentenced after failing to adequately

control employees' exposure to respirable silica dust, resulting in an employee developing silicosis.

Burnley Magistrates' Court heard how prior to 2017, employees of G0 Stonemasonry Limited in Accrington carried out work that resulted in exposure to respirable silica dust.

An investigation by the HSE found that GO Stonemasonry Limited had been cutting and working with stone for several years without any suitable and sufficient dust extraction. The company failed to ensure that respiratory protective equipment (RPE) was adequately controlling the inhalation exposure to respiratory silica dust. The company did not have appropriate work processes, systems or control measures in place and had no health surveillance to identify any early signs of effects on workers' health.

GO Stonemasonry Limited, of Turkey Red Industrial Estate, Baxenden, Accrington, pleaded Guilty of breaching section 2(1) of the Health and Safety at Work etc. Act 1974. The company was fined £8000 and ordered to pay costs of £10,000.

HSE inspector Sharon Butler said after the hearing "Silica is found in most rocks, sand and clay and in products such as bricks and concrete. In the workplace these materials create dust when they are cut, sanded or carved. Some of this dust may be fine enough to breathe deeply into your lungs and is known as respirable crystalline silica. Exposure to this dust can cause silicosis, leading to impaired lung function, breathing problems and is life threatening.

"Simple steps to stop workers breathing in the dust must be taken and companies should know HSE will not hesitate to take action against those failing to protect their workers' health."
