

HK preps for 5G future

Fifth generation (5G) mobile networks are the catalyst for smart city development and Hong Kong is all geared up for the commercial launch of 5G services and applications in 2020.

News.gov.hk spoke to the Office of the Communications Authority and the Hong Kong Applied Science and Technology Research Institute for an insight into the preparatory work involved, including technical trials of an autonomous vehicle being carried out at the Science Park.

The story appears on news.gov.hk today (August 10) in text and video format.
