

[Hong Kong Customs seizes suspected smuggled electronic parts worth about \\$8 million \(with photo\)](#)

Hong Kong Customs today (November 28) seized approximately 8 000 pieces of suspected smuggled electronic parts, including central processing units and computer RAM units, with a total estimated market value of about \$8 million at the Hong Kong-Zhuhai-Macao Bridge Hong Kong Port.

Based on risk assessment, Customs intercepted a suspicious outgoing private car at the control point this early morning. Upon examination, Customs officers seized the batch of suspected smuggled electronic parts inside the boot of the vehicle. A 37-year-old male driver and a 37-year-old male passenger suspected to be connected with the case were arrested.

An investigation is ongoing.

Customs will continue to combat smuggling activities by use of cross-boundary private cars with firm enforcement action based on risk assessment and intelligence analysis.

Smuggling is a serious offence. Under the Import and Export Ordinance, any person found guilty of importing or exporting unmanifested cargo is liable to a maximum fine of \$2 million and imprisonment for seven years.

Members of the public may report any suspected smuggling activities to Customs' 24-hour hotline 2545 6182 or its dedicated crime-reporting email account (crimereport@customs.gov.hk) or online form (eform.cefs.gov.hk/form/ced002).
