

# Hong Kong's Balance of Payments and International Investment Position statistics for third quarter of 2022

The Census and Statistics Department (C&SD) released today (December 21) the preliminary Balance of Payments (BoP) and International Investment Position (IIP) statistics of Hong Kong for the third quarter of 2022. This release also included the preliminary External Debt (ED) statistics of Hong Kong for the same period.

## I. Balance of Payments

Hong Kong recorded a BoP deficit of \$138.4 billion (19.0% of Gross Domestic Product (GDP)) in the third quarter of 2022. Reserve assets correspondingly decreased by the same amount. This compared with a BoP deficit of \$159.8 billion (23.7% of GDP) in the second quarter of 2022.

### Current account

The current account recorded a surplus of \$115.8 billion (15.9% of GDP) in the third quarter of 2022. This implies that Hong Kong's savings was greater than its investment, enabling Hong Kong to accumulate external financial assets (such as equity securities or debt securities) as a buffer against global financial volatilities. Compared with the current account surplus of \$91.0 billion (12.4% of GDP) in the third quarter of 2021, the increase in surplus was mainly due to the increases in goods surplus and services surplus.

The goods surplus increased to \$13.2 billion in the third quarter of 2022, compared with \$3.2 billion in the same quarter of 2021. Over the same period, the services surplus increased from \$34.0 billion to \$43.6 billion. The primary income inflow and outflow amounted to \$480.2 billion and \$417.4 billion respectively, thus yielding a net inflow of \$62.8 billion in the third quarter of 2022, compared with a net inflow of \$58.8 billion in the same quarter of 2021.

### Financial account

An overall net outflow of financial non-reserve assets amounting to \$286.7 billion (39.3% of GDP) was recorded in the third quarter of 2022, compared with an overall net outflow of \$220.8 billion (32.7% of GDP) in the second quarter of 2022. The overall net outflow recorded in the third quarter of 2022 was due to net outflows of portfolio investment and other investment, partly offset by net inflows of cash settlement of financial derivatives and direct investment.

In the third quarter of 2022, reserve assets decreased by \$138.4 billion, compared with a decrease of \$159.8 billion in the second

quarter of 2022.

## II. International Investment Position

At the end of the third quarter of 2022, both Hong Kong's external financial assets and liabilities stood at a very high level, amounting to \$46,499.8 billion (16.4 times of GDP) and \$33,532.2 billion (11.8 times of GDP) respectively, a typical feature of a prominent international financial centre.

Hong Kong's net external financial assets (i.e. assets minus liabilities) amounted to \$12,967.6 billion (4.6 times of GDP) at the end of the third quarter of 2022, compared with \$14,804.5 billion (5.2 times of GDP) at the end of the second quarter of 2022. Hong Kong's net external financial assets to GDP ratio is one of the largest in the world, which provides the economy with a strong cushion against sudden external shocks.

## III. External Debt

At the end of the third quarter of 2022, Hong Kong's gross ED amounted to \$14,309.9 billion (5.0 times of GDP). Compared with \$14,421.4 billion (5.1 times of GDP) at the end of the second quarter of 2022, gross ED decreased by \$111.6 billion. This was mainly attributable to the decrease in ED of the banking sector, partly offset by the increases in ED of other sectors and ED of the Hong Kong Monetary Authority.

As one of the world's major financial centres, Hong Kong has a significant amount of ED held against the local banking sector arising through normal banking businesses. At the end of the third quarter of 2022, 58.3% of Hong Kong's ED was attributable to the banking sector. Other ED mainly consisted of ED of other sectors (25.3%) and debt liabilities in direct investment (intercompany lending) (15.9%).

### Further information

BoP is a statistical statement that systematically summarises, for a specific time period (typically a year or a quarter), the economic transactions of an economy with the rest of the world (i.e. between residents and non-residents).

IIP is a balance sheet showing the stock of external financial assets and liabilities of an economy at a particular time point. The difference between the external financial assets and liabilities is the net IIP of the economy, which represents either its net claim on or net liability to the rest of the world.

Gross ED, at a particular time point, is the outstanding amount of those actual current, and not contingent, liabilities that are owed to non-residents by residents of an economy and that require payment of principals and/or interests by the debtors at some time points in the future.

Table 1 presents Hong Kong's BoP. Table 2 presents the detailed current account, while Table 3 presents the detailed capital and financial account.

Table 4 shows Hong Kong's IIP, and Table 5 shows Hong Kong's ED.

Statistics on BoP, IIP and ED for the third quarter of 2022 are preliminary figures, which are subject to revision upon the availability of more data. With the incorporation of the latest data from surveys and other sources, the statistics on BoP, IIP and ED for 2021 have been revised.

More details of the statistics of BoP (including seasonally adjusted current account), IIP and ED, together with the conceptual and methodological details, are presented in the publication Balance of Payments, International Investment Position and External Debt Statistics of Hong Kong, Third Quarter 2022 published by the C&SD. Users can download the publication at the website of the C&SD
