

Import of poultry eggs from Nellore District of Andhra Pradesh State in India suspended

The Centre for Food Safety (CFS) of the Food and Environmental Hygiene Department announced today (April 11) that in view of a notification from the World Organisation for Animal Health (WOAH) about an outbreak of highly pathogenic H5N1 avian influenza in Nellore District of Andhra Pradesh State in India, the CFS has instructed the trade to suspend the import of poultry eggs from the area with immediate effect to protect public health in Hong Kong.

A CFS spokesman said that Hong Kong has currently established a protocol with India for the import of poultry eggs but not for poultry meat. According to the Census and Statistics Department, no eggs were imported into Hong Kong from India last year.

"The CFS has contacted the Indian authority over the issue and will closely monitor information issued by the WOAH and the relevant authorities on the avian influenza outbreak. Appropriate action will be taken in response to the development of the situation," the spokesman said.
