

Import of poultry meat and products from areas in Canada suspended

The Centre for Food Safety (CFS) of the Food and Environmental Hygiene Department announced today (December 5) that in view of a notification from the World Organisation for Animal Health (WOAH) about outbreaks of the highly pathogenic H5N1 avian influenza in Fraser Valley Regional District of the British Columbia Province, Municipality of Adelaide Metcalfe of Ontario Province and the County of Forty Mile of Alberta Province in Canada, the CFS has instructed the trade to suspend the import of poultry meat and products (including poultry eggs) from the above-mentioned areas with immediate effect to protect public health in Hong Kong.

A CFS spokesman said that according to the Census and Statistics Department, Hong Kong imported about 90 tonnes of frozen poultry meat from Canada in the first nine months of this year.

â€œThe CFS has contacted the Canadian authority over the issue and will closely monitor information issued by the WOAH and the relevant authorities on the avian influenza outbreaks. Appropriate action will be taken in response to the development of the situation," the spokesman said.
