

## Import of poultry meat and products from areas in Korea suspended

â€‹The Centre for Food Safety (CFS) of the Food and Environmental Hygiene Department announced today (January 29) that in view of a notification from the Ministry of Agriculture, Food and Rural Affairs of Korea about outbreaks of highly pathogenic H5N1 and H5N6 avian influenza in Cheonan-si of Chungcheongnam-do Province and Anseong-si of Gyeonggi-do Province respectively in Korea, the CFS has instructed the trade to suspend the import of poultry meat and products (including poultry eggs) from the above-mentioned areas with immediate effect to protect public health in Hong Kong.

A CFS spokesman said that according to the Census and Statistics Department, Hong Kong imported about 70 tonnes of chilled and frozen poultry meat and about 31.45 million poultry eggs from Korea last year.

"The CFS has contacted the Korean authority over the issue and will closely monitor information issued by the World Organisation for Animal Health and the relevant authorities on the avian influenza outbreaks. Appropriate action will be taken in response to the development of the situation," the spokesman said.
