

Import of poultry meat and products from areas in Poland and Japan suspended

The Centre for Food Safety (CFS) of the Food and Environmental Hygiene Department announced today (November 10) that in view of a notification from the World Organisation for Animal Health (OIE) about an outbreak of highly pathogenic H5N1 avian influenza in Tarnogórski District of Śląskie Region in Poland, and a notification from the Ministry of Agriculture, Forestry and Fisheries of Japan about an outbreak of highly pathogenic H5 avian influenza in Akita Prefecture in Japan, the CFS has instructed the trade to suspend the import of poultry meat and products (including poultry eggs) from the above-mentioned areas with immediate effect to protect public health in Hong Kong.

A CFS spokesman said that according to the Census and Statistics Department, Hong Kong imported about 4 070 tonnes of frozen poultry meat and about 24.82 million poultry eggs from Poland and about 40 tonnes of chilled poultry meat, about 2 530 tonnes of frozen poultry meat and about 210.28 million poultry eggs from Japan in the first nine months of this year.

"The CFS has contacted the Polish and Japanese authorities over the issues and will closely monitor information issued by the OIE and the relevant authorities on the avian influenza outbreaks. Appropriate action will be taken in response to the development of the situation," the spokesman said.
