

## Import of poultry meat and products from areas in UK suspended

â€‹The Centre for Food Safety (CFS) of the Food and Environmental Hygiene Department announced today (January 24) that in view of notifications from the World Organisation for Animal Health (WOAH) about outbreaks of highly pathogenic H5N1 avian influenza in Rother District of East Sussex County and Shropshire District of Shropshire County in the United Kingdom (UK), the CFS has instructed the trade to suspend the import of poultry meat and products (including poultry eggs) from the above-mentioned areas with immediate effect to protect public health in Hong Kong.

A CFS spokesman said that according to the Census and Statistics Department, Hong Kong imported about 900 tonnes of chilled and frozen poultry meat and about 990 000 poultry eggs from the UK in the first nine months of last year.

"The CFS has contacted the British authority over the issue and will closely monitor information issued by the WOAH and the relevant authorities on the avian influenza outbreaks. Appropriate action will be taken in response to the development of the situation," the spokesman said.
