

Import of poultry meat and products from Bács-Kiskun County in Hungary suspended

The Centre for Food Safety (CFS) of the Food and Environmental Hygiene Department announced today (March 27) that in view of a notification from the World Organisation for Animal Health (OIE) about an outbreak of highly pathogenic H5N8 avian influenza in Bács-Kiskun County, Hungary, the CFS has instructed the trade to suspend the import of poultry meat and products, including poultry eggs, from the district with immediate effect to protect public health in Hong Kong.

A CFS spokesman said that Hong Kong has currently established a protocol with Hungary for the import of poultry meat but not for poultry eggs. According to the Census and Statistics Department, Hong Kong imported about 3 170 tonnes of frozen poultry meat from Hungary last year.

"The CFS has contacted the Hungarian authorities over the issue and will closely monitor information issued by the OIE on avian influenza outbreaks. Appropriate action will be taken in response to the development of the situation," the spokesman said.
