

Import of poultry meat and products from Lisboa in Portugal suspended

The Centre for Food Safety (CFS) of the Food and Environmental Hygiene Department announced today (February 8) that in view of a notification from the World Organisation for Animal Health (OIE) about an outbreak of highly pathogenic H5N1 avian influenza in Lisboa in Portugal, the CFS has instructed the trade to suspend the import of poultry meat and products (including poultry eggs) from the area with immediate effect to protect public health in Hong Kong.

A CFS spokesman said that according to the Census and Statistics Department, no poultry meat or eggs were imported into Hong Kong from Portugal last year.

"The CFS has contacted the Portuguese authority over the issue and will closely monitor information issued by the OIE and the relevant authorities on the avian influenza outbreaks. Appropriate action will be taken in response to the development of the situation," the spokesman said.
