

# Import of poultry meat and products from Rebild Municipality in Denmark suspended

The Centre for Food Safety (CFS) of the Food and Environmental Hygiene Department announced today (March 4) that in view of a notification from the World Organisation for Animal Health (OIE) about an outbreak of low pathogenic H5 avian influenza in Rebild Municipality, Denmark, the CFS has instructed the trade to suspend the import of poultry meat and products, including poultry eggs, from the area with immediate effect to protect public health in Hong Kong.

A CFS spokesman said that Hong Kong imported about 1 340 tonnes of frozen poultry meat and about 1 560 000 poultry eggs from Denmark last year.

"The CFS has contacted the Danish authorities over the issue and will closely monitor information issued by the OIE on avian influenza outbreaks. Appropriate action will be taken in response to the development of the situation," the spokesman said.
