

# Improvements to the Green Circular route in the West End #dundeewestend

I am pleased to advise that the City Council has confirmed to me that it is looking at improvements to where the Green Circular route crosses the Perth Road.

Currently at this location cyclists and pedestrians use the existing carriageway junction cross as there is no footpath provision at this point.

The proposed works will include a new footpath creating a safer crossing as the images indicate :

There are also a couple of locations along Riverside Avenue where vegetation will be cutback to effectively widen the useable footpath/cycleway.
