

Joint Press Statement on Ukraine

Russia held a meeting at the UN today on what Russia claims is the status of the implementation of the Minsk agreements. This meeting was a transparent attempt to present a false and misleading narrative regarding the conflict in eastern Ukraine. We strongly reject Russia's premise that it is acting as a mediator within an internal conflict. Russia is an active participant that trains, arms, and leads armed formations in areas outside of Ukrainian government control, supplementing these proxy forces with military personnel and equipment. It instigated and continues to fuel a conflict which has resulted in approximately 13,000 deaths, appalling human rights abuses, and a deteriorating humanitarian situation for the civilian population.

We reiterate our support for the Minsk agreements and our firm commitment to see the peaceful resolution of the conflict with full respect of Ukraine's sovereignty and territorial integrity. We welcome the steps taken by the Ukrainian government to make progress in resolving the conflict and call on Russia to act likewise.

We will continue to engage with all initiatives at the UN that support constructive ends. This event, designed purely to distort the realities of the conflict in eastern Ukraine, served Russian interests alone.
