

Latest service arrangements of DH's Tuberculosis and Chest Service

In response to the latest developments of the COVID-19 epidemic situation, the Tuberculosis and Chest Service (TB&CS) of the Department of Health today (March 3) announced that the directly observed treatment service on Saturday mornings of all chest clinics will be suspended from March 5 until further notice.

The TB&CS has contacted, and made separate arrangements for, the affected users of the service accordingly.

Please visit the TB&CS website (www.info.gov.hk/tb_chest), or contact the relevant clinics directly if necessary.
