

Lighting problem resolved #dundeewestend

I am pleased to say, after considerable correspondence I have had with various parties, the lighting in the pathway from Simpson Avenue in the Ninewells Village hospital housing down to Clayhills Drive is now finally repaired and working again – see left :

The lighting had been out of action for some time and there was a question mark as to who had responsibility for this lighting which sits south of the Ninewells Hospital grounds and north of Clayhills Drive.

I am grateful to all parties I have contacted for moving this forward – NHS Tayside, Netlach (who manage the Ninewells housing site), the factors of the Clayhills Drive/Ninian's View development and the council's Street Lighting Partnership.

The path was previously extremely dark at this location at night and it is much safer now the lighting is back on.
