

[Magnox seeks suppliers for major decommissioning projects](#)

Magnox Limited is inviting suppliers to collaborate on two separate decommissioning projects at the former nuclear research site at Harwell, Oxfordshire.

Interested companies are invited to join pre-market engagement webinars on Wednesday 5 October 2022 to:

Investigate the current market capabilities and gain knowledge about existing and future products, and techniques which may assist informing the development of the sourcing strategy and any subsequent tender documentation.

Explore supply chain interest and expertise and to gain knowledge about existing or future products and techniques that could deliver this work.

Companies that are either new to nuclear or existing decommissioning suppliers are encouraged to attend.

BEPO reactor decommissioning programme

Comprises of two main projects running in tandem: BEPO reactor project and BEPO ancillary project. Magnox is seeking early engagement with suppliers on how they can support delivery of the BEPO reactor scope of works depending on the outcome of the scheme design being developed and suggested costs.

Further information is available on the prior information notice [here](#).

Click [here](#) to sign up for the preliminary market engagement webinar commencing 10am Wednesday 5 October.

B220 Radiochemistry laboratory complex

A three year £7.9m project to establish the legacy radiochemistry inventory and to complete a refurbishment and demolition asbestos survey within the B220 complex prior to its future de-plant and demolition.

The facility consists of approximately 120 laboratories and offices that supported the UK's pioneering nuclear mission for over six decades. Further information is available on the prior information notice [here](#)

Click [here](#) to sign up for the market engagement webinar commencing 1.30pm Wednesday 5 October.

Interested suppliers should have the capability to deliver value for the UK taxpayer while also maintaining the highest standards of safety and social

value.

Linda Sapsford, Magnox Head of Procurement and Supply Chain, said: "This is an incredibly exciting time in the nuclear industry and the opportunities at Magnox have never been so great. 60% of our mission is delivered through our specialist supply chain partners who all form an integral part of the Magnox team. Our continued goal is to forge and sustain effective and productive relationships via collaborative, transparent and well-regulated procurement delivery."
