

Miller's Wynd car park improvements

#dundeewestend

Residents will recall that, back in November, [I highlighted](#) the poor maintenance of the Miller's Wynd car park – the foliage was very tired and there were dumped items across the car park.

The acquisition by Dundee City Council of the Miller's Wynd car park – from the University of Dundee – has provided much-needed additional free 2 hour parking in this area of Perth Road. However, it is important the infrastructure of the car park is improved and I contacted Dundee City Council seeking improvements.

I am pleased to say that the overgrown foliage has now been tackled and the dumped items removed – see below :

The Head of Roads and Transportation at the council has now advised me :

"I hope to see this car park given a fuller bit of design attention and I will ... arrange for a bit of multi department design, surface, vegetation, seating, recycling, lighting and issues and there will be an element of community co-design.

This all won't happen overnight and it is not best if we do it in uncoordinated manner/piecemeal manner without an end plan."

It has been agreed that at a community walkabout I am participating in soon – along with council officers, community council and ward colleagues – the car park will be visited and plans further discussed. The main purpose of the walkabout is to agree specific actions to improve West End car parking – hopefully this will result in concrete progress on this long-standing problem.
