

National Statistics: Historical statistics notices on Agriculture in the English regions

Updated: Added 2016 2nd estimate statistical notice.

This publication gives previously published copies of the National Statistics publication, since June 2013, about agricultural performance in the English regions. The regions are defined according to the European Union Nomenclature of Units for Territorial Statistics – level 1 (NUTS1), which for England means the North West, North East etc. The publication summarises key components of the production and income accounts for UK agriculture and describes the relative growth in Total Income from Farming in the short and medium term. The contribution that the agricultural industry makes to the regional economy is compared with that for England as a whole.

This information is published biannually, currently in June and December. Each publication gives the figures available at that time. The figures are subject to revision as new information becomes available.

The latest publication and accompanying data set can be found [here](#)
