## **Nature & Technology**

As has been part of our practise for many years, welters® focus with determination to embrace nature, and the environment, in our products and philosophies. This is achieved through the use of UK

resources and facilities and includes the use of reconstituted materials within

our manufacturing processes. We

endeavour to maintain our 'Made in Britain' ethos and develop product designs that are in keeping with our natural habitat.

welters has always attempted to minimise imports,

especially of non-environmentally friendly material, and particularly when exported

from the opposite side of the globe and produced by nations which may pay less

attention to environmental issues. **Welterstone** was created as a solution to this issue, producing products manufactured

locally from indigenous quarried material.

As a result of the success of **Welterstone**, **welters**<sup>®</sup> has not imported any material for several years.

We look forward to

the continuation of the development of our range of products and materials and

embrace the future wholeheartedly.
