

# News story: CIVIL SERVICE LAUNCH PIONEERING ECONOMICS DEGREE APPRENTICESHIP

The UK Civil Service has this week launched the UK's first degree-level apprenticeship in economics – creating new routes to careers in the Civil Service for young people who would prefer to study for a degree whilst working at the heart of government.

A range of central government departments and agencies including HM Treasury, Department for Work & Pensions (DWP), Department for Business, Energy, Innovation and Science (BEIS), Department for Education (DfE) and Department for Food & Rural Affairs (DEFRA) will provide apprenticeship placements through the new programme – which will offer students a starting salary of about £22k in London and in excess of £20k nationally.

The apprenticeship standard on which the programme is based was developed by a group of economist employers that included HM Treasury, the Bank of England as well as a range of consultancies and third sector organisations. The programme will be delivered in partnership with the University of Kent and will be open to candidates with GCSE maths at grade B (6) or above and 96 UCAS points – equivalent to CCC at A-level, MMM for a BTEC Diploma, DD for a BTEC Certificate.

Joint head of the Government Economics Service and Chief Economic Adviser at HM Treasury, Clare Lombardelli said:

“We are delighted to launch this new programme, which we hope will create new opportunities for talented young people from all parts of the communities we serve to consider economist careers in Government.”

Sam Beckett, joint head of the GES and Director General in BEIS said:

“This is an exciting new initiative for the economics profession. I am looking forward to working with the new apprentices who will join us next year – and hope to see other employers launching similar programmes in the months to come.”

Professor Karen Cox, Vice-Chancellor and President, University of Kent said:

“We are proud to have been selected to deliver the programme working with colleagues across the Government Economics Service. At Kent we have a long history of delivering undergraduate degree courses in economics to a very high standard.

We are looking forward to working with GES to deliver an apprenticeship programme which provides participants with on and off the job training and support that will prepare them for long and successful economist careers.”
