

[News story: DIO awards contract for new jetty at HMNB Devonport Oil Fuel Depot](#)

DIO awarded a contract worth approximately £43 million to VolkerStevin to construct a new jetty at Thanckes Oil Fuel Depot which provides fuelling facilities for the Royal Navy at Devonport Naval Base.

The project will deliver a new jetty with fuel loading and fire fighting facilities; the fire fighting facilities within the depot will also be replaced. The jetty will be constructed within a Special Area of Conservation on the River Tamar and the project has to comply with stringent environmental regulations. The completed facility will service all of the Navy fuelling requirements at Devonport.

Bill Hughes, DIO Project Manager said:

This is a key milestone in the Navy Oil Fuel Depot upgrade programme. There have been considerable environmental challenges and constraints that have been successfully navigated through the excellent efforts of the Project team and we look forward to working in collaboration with VolkerStevin to ensure the successful delivery of this operationally critical project.

Terry O'Connor, DIO Account Director for VolkerStevin said:

We are delighted to have been awarded the design and construction of the new jetty at Thanckes Oil Fuel Depot. It continues our long association with the DIO and Royal Navy in providing key critical infrastructure solutions and we look forward to working closely with the project team and key stakeholders to deliver this strategically important scheme.

The dredging and clearing works are due to commence in January 2018 with the main piling works starting in September 2018 to avoid the annual fish migration season. The jetty is due to be in service by November 2019. The Thanckes Jetty is the first in a number of projects to modernise the Oil Fuel Depots in Devonport and Portsmouth to service the fuelling of the Naval Fleet in both ports.
