

[News story: Do you want to help shape the future of energy?](#)

Our scientists and engineers are working with partners around the globe to develop fusion as a new source of clean energy for future power stations. In partnership with industry and academia we are also developing opportunities to work together to enable our expertise to be used in non-nuclear applications, with an increased technology focus.

We are seeking two Non-Executive Directors (NEDs) for the UKAEA Board; one a Financial expert (who will also chair the Audit Committee) and the other an academic or R&D leader.

The positions are public appointments. Further information and application details are available on:

Finance NED
