

News story: Fuel for thought as motorists head off on Easter getaway

Almost 98 per cent of motorways and strategic A roads will be roadworks-free over the bank holiday, meaning motorists and their passengers can enjoy journeys with as little disruption as possible.

We are also reminding drivers to check their vehicles before they set off as it was revealed around 20 motorists break down every day because they have run out of fuel.

Latest statistics show almost half of all breakdowns are caused by simple mechanical problems which could be avoided with simple checks. Nearly a quarter are caused by tyre problems.

Highways England Chief Executive, Jim O'Sullivan said:

I want all drivers to arrive at their destinations safely. We are removing almost all of our roadworks across the country to make people's journeys easier for people this Easter and we are urging drivers to make sure they are ready by checking their fuel, tyres, and lights. Anyone who runs out of fuel is putting themselves and other road users, including their own passengers at risk. With a few simple checks that risk can be overcome and everyone will be safer.

The government is investing £15 billion to improve the strategic road network. The improvements will keep traffic moving even in the busiest periods, cutting congestion – and we are taking action to reduce delays over the bank holiday break. We are completing 190 and suspending 119 miles of roadworks by 6am on 13 April until 12.01am on 18 April to help people get away this Easter with as little disruption as possible.

Schemes completed in time for the Easter getaway include:

- A556 – the £192m Knutsford to Bowdon dual carriageway linking junction 19 of the M6 to junction 7 of the M56 was completed on time and on budget after a 28 month build programme
- A590 – our £1m project to realign and raise the carriageway at Lindal near Ulverston, removing a the long-running Lindal 'Dip' issue which led to carriageway closures during flooding was completed
- £191 million improvement scheme at Catthorpe Junction 19 of the M1 – which will revolutionise the journeys made by more than 142,000 vehicles through the area every day

And before they set off we are urging drivers to:

- check fuel: make sure you have enough to get to your destination

- check tyres: before setting off on a long/significant journey, check your tyre pressure and the condition of your tyres, including the spare; look out for cuts or wear and make sure the tyres have a minimum tread depth of 1.6mm, which is the legal limit
- check engine oil: use your dipstick to check oil before any long journey, and top up if needed; take your car back to the garage if you're topping up more than usual
- check water: to ensure you have good visibility, always keep your screenwash topped up so you can clear debris or dirt off your windscreen
- check your lights: If your indicators, hazard lights, headlights, fog lights, reverse lights or brake lights are not functioning properly, you are putting yourself at risk; in addition, light malfunctions can be a reason for your vehicle to fail its MOT

You can [view a map showing the locations of lifted and completed schemes](#).

By suspending or completing roadworks, more lanes will be open and many speed restrictions will be lifted. Those wishing to find out more about driving on smart motorways can find further information on our [smart motorways guidance page](#).

Drivers planning to use the Dartford Crossing are reminded to pay Dart Charge in advance or by midnight the day after crossing.

More information can be found [on our website](#) or by calling our information line (0300 123 5000) to keep up to date with conditions on the roads.

For more detailed information on how to carry out your vehicle checks, [view the Think! website](#).
