

[News story: Jem Eskenazi joins UK Export Finance as Chief Technology Officer](#)

At UKEF, Jem will act as a champion for digital technologies within UKEF, responsible for innovation and adoption of new technologies as the department further develops its digital support for exports.

Jem brings significant experience of digital innovation in the international finance industry, having previously worked for the European Bank for Reconstruction and Development as its Information Technology Managing Director.

Prior to this Jem has also held several Chief Information Officer posts, as well as undertaking various Non-Executive Director roles. He has experience in a number of geographic regions and industries, including financial services, mobile telecommunications, medical systems, industrial gases and pharmaceuticals.

Throughout his career, he has focused on the strategic evolution of IT functions, projects and roles, with a particular focus on improving integration with other departments.

Bhaskar Dasgupta, Chief Operating Officer at UKEF, said:

We're delighted to welcome Jem to UKEF as Chief Technology Officer, with his extensive experience of delivering user-centred digital services. His pioneering approach to information technology teams and systems will ensure we in UKEF can continue to make exports happen by driving innovative technological solutions across the business.

Jem Eskenazi, Chief Technology Officer at UKEF, added:

UKEF provides competitive, innovative and flexible support for exports for firms of any size, in any sector. It therefore needs internal and external digital infrastructure that meets requirements as diverse and dynamic as the customers we support. I am delighted to have the opportunity to lead the organisation's next phases in IT efficiency and innovation.
