

[News story: Making energy clean, affordable and secure: apply for funding](#)

Businesses can apply for a share of £13 million for innovative projects that address the issues of cost, emissions and security of supply.

The Energy Catalyst has up to £13 million to support innovative market-focused projects in the energy sector both in the UK and in developing countries.

This competition is cofunded by the [Department for International Development](#), the [Department for Business, Energy & Industrial Strategy](#) and the [Engineering and Physical Sciences Research Council](#). It is being run by Innovate UK.

Rapid change in energy systems

Energy systems around the world are facing rapid change. There is a clear need to address the challenge of providing energy that is clean, affordable and secure at the same time.

The competition aims to help UK businesses to grasp the opportunities on offer through meeting the challenges facing the energy sector. There are 3 types of award for projects that are at an early, mid or late stage of development.

This is the fifth round of the Energy Catalyst. More than 200 projects with a total value of £200 million have already been funded in the previous 4 rounds.

Competition information

- this competition opens on 24 April 2017, and the deadline for registration is midday on 21 June 2017
- the competition is open to any UK organisation and may involve international partners
