

[News story: New Quality and Assurance framework open now](#)

Crown Commercial Service is helping the public sector to test the quality of IT services with a new framework agreement, developed in partnership with the Home Office.

Quality and Assurance Testing is [live now](#), and gives central government and the wider public sector access to pre-evaluated suppliers of IT testing services.

Of the 42 suppliers on the framework, 26 (62%) are small and medium-sized enterprises.

What is the framework for?

If you're designing and/or building a digital requirement or cloud service integration, you may need independent, specialist quality assurance and/or testing before you go live to ensure a smooth implementation.

The new agreement complements other [digital agreements](#) such as:

- Digital Outcomes and Specialists (DOS)
- G-Cloud
- Cyber Security Services
- Crown Hosting

The services available will support testing functionality, usability and performance using independent specialist service expertise.

What is on offer?

Buyers can choose from one of four flexible mini competition options, to select their supplier to deliver a wide range of testing and quality assurance services.

Services available under the new agreement are:

- Lot 1: Quality Assurance and Testing Specialists
- Lot 2: Automation, Agile and Development Opportunities
- Lot 3: Load and Performance Testing
- Lot 4: Functional Testing
- Lot 5: Infrastructure Testing and Environments
- Lot 6: Operational Acceptance Testing and Disaster Recovery
- Lot 7: Quality Assurance and Testing Management
- Lot 8: Strategic Quality Assurance Consultancy

Buyer Confidence

Only Suppliers who have passed the Home Office's robust evaluation will be able to bid for work under the agreement, giving you an extra level of reassurance.

All Suppliers on this agreement have signed up to government terms and conditions, making tendering simple and effective.
