

[News story: Social hub takes shape at Worthy Down](#)

The new building, which is part of a £250 million tri-service facility that DIO is building at Worthy Down in Hampshire, includes four bars, a large dining room, kitchens, recreational, food court and shopping facilities. The internal fit out of the CRL will now start. Once up and running the CRL will be the social hub for the Junior Ranks'. It will be a central meeting place and leisure facility for permanent staff and visiting students. The CRL is one of 26 buildings that the Defence Infrastructure Organisation (DIO) is delivering with our main contractor, Skanska. The 26 buildings we're providing are a mix of technical training and classroom facilities and accommodation.

Peter Riches, DIO Project Manager for the project, said:

DIO supports service personnel by providing a fit-for-purpose estate and accommodation so we're pleased to be working with Skanska to deliver these facilities. The CRL will provide students from the college with a first class, modern leisure and recreational facility that should make their overall experience of the college a pleasant one.

Paul Weale, Project Director for Skanska, said:

We're pleased that the CRL facility meets both the military and DIO's expectations, in terms of its function and quality. This building has been created through strong collaboration between the DIO and Skanska and will meet the needs of personnel from all three services for many years to come.

Once complete, the DCPLA site at Worthy Down will enable the Ministry of Defence (MOD) to train personnel more effectively and efficiently to deliver the best possible support for military operations. Locating the tri-services' training to one site will support centralised training and provide better resources. In addition, military personnel will have the opportunity to share best practice and knowledge to deliver the individual training requirements. Savings will be delivered through economies of scale, shared resources, technology and the disposal of selected sites.

Brigadier Steve Shirley, who will be in charge of the college when it opens, said:

The CRL building will provide both our students and staff with a modern meeting place where they can enjoy much-earned recreational

time. The facilities are superb. I am very proud to be leading on such a prominent project that will bring modern, multi-purpose facilities to Worthy Down.

The college will provide specialist training facilities and modern accommodation for up to 1,500 students, designed in a series of 'villages'; one for Junior Ranks, one for Officers and one for Senior Non-Commissioned Officers (SNCOs). Trainees and permanent staff will have access to sports and recreation facilities, Officer and SNCO Messes, including supporting amenities. The Royal Logistics Corps Museum will also relocate to Worthy Down into a purpose built exhibition space, which will be available for soldiers, families and community use.
