## <u>Official Statistics: Landings of</u> <u>selected shared quota stocks from UK</u> <u>waters: 2012 – 2016</u>

This release contains provisional estimates of landings of some commercial sea fishery quota stocks shared by the UK, non-UK EU member states and, in some cases, Norway.

It is planned that these provisional data will be followed by a more detailed release, covering a wider range of quota stocks, accompanying the UK Sea Fisheries Statistics 2017 annual publication in September 2018.
