

Official Statistics: UK farm animal genetic resources (FAnGR): breed inventory results

Updated: Minor revisions to UK FAnGR Breed Inventory dataset.

This release presents results from a pilot annual inventory for monitoring livestock breed populations and breeding structures. It provides data on the status and trends in the domestic pig, goat and horse farm animal genetic resources (FAnGR) with continuous data from 2000 to 2017 for around 100 breeds of cattle, sheep, pigs, goats and horses which are present in the UK.

In 2018 an interactive data explorer was added to increase the usefulness of the data to the stakeholders and to give more insights into historic data for individual breeds.
