

Open consultation: Air quality: draft Clean Air Strategy 2018

We would like your views on the actions being proposed to reduce air pollution and its effects. We also want to know if you have any further suggestions. The Clean Air Strategy affects a broad range of sectors and touches on the interests of many.

We are consulting on each of the main themes of the strategy document:

- our understanding of the problem
- protecting the nation's health
- protecting the environment
- securing clean growth and innovation
- reducing emissions from transport
- reducing emissions from farming
- reducing emissions from industry
- international, national and local leadership

We're also asking for your views on the strategy as a whole.
