

[Press release: Humber habitat creation scheme plans on show](#)

Residents are being invited to learn more about the Outstays to Skeffling Managed Realignment Scheme by attending the surgery at Patrington Village Hall, Church Lane, 11am to 3.3pm on Thursday 5 July.

Being delivered in partnership with Associated British Ports, the scheme will see a new inter-tidal environment created that offsets habitat losses from future coastal development and climate change.

It is a legal obligation for the Environment Agency to rebalance the reduction in habitats caused by 'coastal squeeze', which occurs when fixed hard flood defence structures, built to protect people and properties along the coast, reduce the inter-tidal land between low and high tide as a result of rising sea levels.

As part of the proposed scheme a 900 acre natural habitat site will be created for estuarine and terrestrial wildlife and an improved landscaped flood defence will surround this area to help reduce the risk of flooding to the local community.

The Environment Agency and Associated British Ports say they are hoping to announce the final design and plans this autumn, with the planning application being submitted before the end of the year and construction starting in spring 2019.
