

Press release: Joint statement from Prime Minister May and Prime Minister Rutte

We have, with the operations exposed today, further shone a light on the unacceptable cyber activities of the Russian military intelligence service, the GRU. It has targeted institutions across the world, including the Organisation for the Prohibition of Chemical Weapons (OPCW) in The Hague.

This attempt, to access the secure systems of an international organisation working to rid the world of chemical weapons, demonstrates the GRU's disregard for the global values and rules that keep us all safe.

The GRU's reckless operations stretch from destructive cyber activity to the use of illegal nerve agents, as we saw in Salisbury. That attack left four people fighting for their lives and one woman dead.

Our action today reinforces the clear message from the international community: We will uphold the rules-based international system, and defend international institutions from those that seek to do them harm.
