

[Press release: New flood scheme in Rugeley officially opened](#)

Members of the Environment Agency, Cannock Chase District Council, the Stoke-on-Trent and Staffordshire Local Enterprise Partnership (LEP), Rugeley Town Council, Staffordshire County Council and the Trent Regional Flood & Coastal Committee visited Rugeley today (Monday 18 December) to mark the completion of the project.

The newly completed Rugeley flood scheme, which was delivered by the Environment Agency, will help to reduce the risk of flooding from the Rising Brook for 114 residential and 159 commercial properties. It also forms an integral part of Cannock Chase District Council's plans to regenerate parts of the town centre.

Work on the project, which started in December 2016, saw construction of a 350m long embankment, which is 4m high at its highest point, on Hagley playing fields. This embankment has created a flood storage area which will store water from the Rising Brook during times of heavy rainfall and then slowly release it back into the watercourse when levels no longer pose a flood risk.

Mark Swain from the Environment Agency said:

This scheme is fantastic news for the people of Rugeley as it will help reduce the risk of flooding to a significant number of residential properties and businesses. Not only that but it is an important step in unlocking Rugeley's potential for future investment, regeneration and growth, something which would be challenging if the town remained at risk of serious flooding.

Stoke-on-Trent and Staffordshire LEP chairman David Frost CBE said:

This impressive project is very good news for Rugeley, protecting town centre homes and businesses from flooding and making the town a better place to live, work and visit.

This scheme means businesses will have a secure foundation when they make plans to expand, without the risk of their hard work literally being washed away. It is also creating an attractive green space for local people to enjoy.

Cllr John Kraujalis Corporate Improvement Portfolio Leader for Cannock Chase Council said:

This scheme is an excellent example of true partnership working in action. The improvements will provide protection and peace of mind to residents and commercial businesses alike that were at risk from flooding from the Rising Brook. The Environment Agency has also successfully procured and delivered a replacement footbridge on behalf of the Council which became unstable a number of years ago and was in desperate need of repair.

Gordon Alcott Economic Development & Planning Portfolio Leader for Cannock Chase Council said:

The works that have been carried out will unlock new development opportunities in Rugeley that have previously been constrained by the flood risk. The Council have already received a planning application for industrial units which could create approximately 60 jobs in the area that would have been affected by flooding prior to this work being carried out.

The scheme has been developed in partnership with Cannock Chase District Council and Staffordshire County Council, and funded by Government Flood Defence Grant in Aid, Stoke-on-Trent and Staffordshire LEP and the Trent Flood and Coastal Committee.
