

Press release: UK House Price Index (HPI) for January 2017

The January data shows an annual price increase of 6.2% which takes the average property value in the UK to £218,255. Monthly house prices have risen by 0.8% since December 2016. The monthly index figure for the UK was 114.5.

In England, the January data shows an annual price increase of 6.5% which takes the average property value to £234,794. Monthly house prices have risen by 0.7% since December 2016.

Wales shows an annual price increase of 4.2% which takes the average property value to £145,933. Monthly house prices have fallen by 0.6% since December 2016.

London shows an annual price increase of 7.3% which takes the average property value to £490,718. Monthly house prices have risen by 3% since December 2016.

Sales during November 2016, the most up-to-date Land Registry figures available, show that:

1. The UK House Price Index (HPI) is published on the second or third Tuesday of each month with Northern Ireland figures updated quarterly. The February 2017 UK HPI will be published at 9.30am on 11 April 2017. A [calendar of release dates](#) is available.
2. Data for the UK HPI is provided by Land Registry, Registers of Scotland, Land & Property Services/Northern Ireland Statistics and Research Agency and the Valuation Office Agency.
3. The UK HPI is calculated by the Office for National Statistics and Land & Property Services/Northern Ireland Statistics and Research Agency. It applies a hedonic regression model that uses the various sources of data on property price, in particular Land Registry's Price Paid Dataset, and attributes to produce estimates of the change in house prices each month. Find out more about the methodology used from [ONS](#) and [Northern Ireland Statistics & Research Agency](#).
4. The first estimate for new build average price (April 2016 report) was based on a small sample which can cause volatility. A three month moving average has been applied to the latest estimate to remove some of this volatility.
5. Work has been taking place since 2014 to develop a single, official HPI that

reflects the final transaction price for sales of residential property in the UK. Using the geometric mean, it covers purchases at market value for owner-occupation and buy-to-let, excluding those purchases not at market value (such as re-mortgages), where the 'price' represents a valuation.

6. Information on residential property transactions for England and Wales, collected as part of the official registration process, is provided by Land Registry for properties that are sold for full market value.
7. The Land Registry dataset contains the sale price of the property, the date when the sale was completed, full address details, the type of property (detached, semi-detached, terraced or flat), if it is a newly built property or an established residential building and a variable to indicate if the property has been purchased as a financed transaction (using a mortgage) or as a non-financed transaction (cash purchase).
8. Repossession data is based on the number of transactions lodged with Land Registry by lenders exercising their power of sale.
9. For England this is shown as volumes of repossessions recorded by Government Office Region. For Wales there is a headline figure for the number of repossessions recorded in Wales.
10. The data can be downloaded as a .csv file. Repossession data prior to April 2016 is not available. Find out more information about [repossessions](#).
11. Background tables of the raw and cleansed aggregated data, in Excel and CSV formats, are also published monthly although Northern Ireland is on a quarterly basis. They are available for free use and re-use under the Open Government Licence.
12. As a government department established in 1862, executive agency and trading fund responsible to the Secretary of State for Business, Energy and Industrial Strategy, Land Registry keeps and maintains the Land Register for England and Wales. The Land Register has been open to public inspection since 1990.
13. With the largest transactional database of its kind detailing more than 24 million titles, Land Registry underpins the economy by safeguarding ownership of many billions of pounds worth of property.
