

# Proposed sewerage works under Advance Site Formation and Engineering Infrastructure Works at Kwu Tung North and Fanling North New Development Areas gazetted

The Government published a notice in the Gazette today (December 14) on the proposed sewerage works under the Advance Site Formation and Engineering Infrastructure Works at Kwu Tung North and Fanling North New Development Areas (KTN and FLN NDAs). The sewerage works have been authorised by the Chief Executive in Council.

A Government spokesman said that the sewerage scheme will provide the essential sewerage infrastructure for collecting and conveying sewage arising from the proposed development plan at the KTN and FLN NDAs for proper treatment and disposal.

The sewerage scheme comprises the following:

- (i) construction of rising mains, gravity sewers, sewage pumping stations and associated manholes for the KTN and FLN NDAs; and
- (ii) ancillary works including reinstatement of carriageways, cycle tracks, footpaths, alleys and open spaces.

Construction works for the sewerage scheme are to be carried out in conjunction with the proposed road works for Advance Site Formation and Engineering Infrastructure Works at KTN and FLN NDAs by the Civil Engineering and Development Department.

Details of the sewerage scheme were published in the Government Gazette on December 31, 2015, and January 8, November 18 and November 25, 2016.
