

Provisional statistics on index of industrial production and producer price index for industrial sector for second quarter of 2023

According to the provisional results of a survey released today (September 13) by the Census and Statistics Department (C&SD), the index of industrial production for manufacturing industries as a whole increased by 2.6% in the second quarter of 2023 compared with a year earlier, following a year-on-year increase of 3.8% in the first quarter of 2023. The corresponding producer price index decreased by 0.2% in the second quarter of 2023 compared with a year earlier, as against a year-on-year increase of 0.9% in the first quarter of 2023.

The index of industrial production for sewerage, waste management and remediation activities increased by 2.2% in the second quarter of 2023 compared with a year earlier, following a year-on-year increase of 0.4% in the first quarter of 2023. The corresponding producer price index decreased by 1.0% in the second quarter of 2023 compared with a year earlier, following a year-on-year decrease of 1.1% in the first quarter of 2023.

Indices of industrial production reflect changes in the volume of local industrial output after discounting the effect of price changes. The price changes are measured by the producer price indices compiled from data on producer prices of selected industrial goods/services collected in the same survey.

Comparing the industrial production in respect of major manufacturing industries in the second quarter of 2023 with that a year earlier, increases in output volume were recorded for all major manufacturing industries. The textiles and wearing apparel industry had the largest increase in output volume (+3.8%), followed by the paper products, printing and reproduction of recorded media industry (+1.5%), the food, beverages and tobacco industry (+1.2%), and the metal, computer, electronic and optical products, machinery and equipment industry (+0.4%).

On a seasonally adjusted basis, the index of industrial production for manufacturing industries as a whole increased by 3.3% in the second quarter of 2023 compared with the first quarter of 2023.

Producer price indices reflect changes in the prices of local output. They measure changes in the actual prices (net of any discounts or rebates allowed to buyers, plus any surcharges) received by producers for their output. Transportation and other incidental charges are not included.

Comparing the second quarter of 2023 with a year earlier, a decrease in

producer price was recorded in the metal, computer, electronic and optical products, machinery and equipment industry (-1.2%). On the other hand, increases in producer prices were recorded mainly in the paper products, printing and reproduction of recorded media industry (+2.9%), the food, beverages and tobacco industry (+1.1%), and the textiles and wearing apparel industry (+0.2%).

Table 1 shows the year-on-year percentage changes in the indices of industrial production by selected industry grouping. Table 2 shows the year-on-year percentage changes in the producer price indices for the industrial sector by selected industry grouping.

The revised figures on indices of industrial production and producer price indices for the industrial sector for the second quarter of 2023 will be released at the website of the C&SD (www.censtatd.gov.hk/en/page_8000.html) and relevant publications of the Department starting from October 19, 2023.

Users can browse and download the reports "Quarterly Index of Industrial Production, 2nd Quarter 2023" (www.censtatd.gov.hk/en/EIndexbySubject.html?pcode=B1070002&scode=310) and "Quarterly Producer Price Index for Industrial Sector, 2nd Quarter 2023" (www.censtatd.gov.hk/en/EIndexbySubject.html?pcode=B1070003&scode=280) at the website of the C&SD.
