

Public hospitals daily update on COVID-19 cases

The following is issued on behalf of the Hospital Authority:

As at 0.00am today (May 21), a total of 533 patients who tested positive for COVID-19 are currently hospitalised for treatment, including 65 new patients. Among the patients staying in isolation facilities, 90 patients are in isolation wards, 22 patients are in second-tier isolation wards and 47 patients are in the North Lantau Hospital Hong Kong Infection Control Centre, of which 29 in total are new patients. The rest of the confirmed patients are hospitalised or readmitted due to other medical reasons. Those patients have recovered and are non-infectious, and therefore do not need to be treated in isolation facilities. Among the hospitalised patients, 10 of them are in critical condition and 10 are in serious condition, of which three critical patients are receiving intensive care. There were 84 patients who have recovered, including 68 patients who have been discharged. In addition, no confirmed patient passed away in public hospitals yesterday (May 20).

In the fifth wave of the epidemic, there are 49 781 patients who have recovered so far, including 49 462 patients who have been discharged. And since early 2020, there are 62 161 patients who have recovered, including 61 842 patients who have been discharged.

The Hospital Authority will maintain close contact with the Centre for Health Protection to monitor the latest developments and to inform the public and healthcare workers on the latest information in a timely manner.
