

Reopening of Water Supplies Department H2OPE Centre

The Water Supplies Department (WSD) announced today (September 10) that the H2OPE Centre (Water Resources Public Education Centre) will be reopened on September 14 (Monday).

To avoid gathering of crowds and maintain social distancing, special arrangements will be implemented at the Centre upon its reopening. The number of admissions to the Centre will be limited. If the number of visitors inside the Centre has reached the limit, admissions will only be allowed when there are visitors leaving the Centre. All visitors will be subject to temperature check and will need to use hand sanitizer before admission. They also need to wear their own masks. Children aged under 12 must be accompanied by an adult. Some interactive exhibits and guided tours of the Centre will be suspended.

The WSD will step up cleaning measures at the Centre and review the above arrangements in due course.
